### **FINE + GROSS MOTOR SKILL DEVELOPMENT**

Vibrant movement, choreography, and instrument play throughout the class activate both small and large muscle groups, promoting your child's overall physical development.

### **EMOTIONAL DEVELOPMENT**

Music will help your child identify what different emotions may “sound” and “feel” like. The different rhythms in our class create intentional shifts in your child’s mood—some boosting their energy levels, while others help them relax.

### **Cognitive Development**

Music and movement stimulate neural connections in the brain, especially in young children. Your child will use reason and logic when identifying music patterns and playing instruments, while the repetition of sounds and syllables will enhance your child’s language development.

### **SOCIAL SKILL DEVELOPMENT**

Connecting with their peers through dynamic song, dance, and instrument play—our classes offer a high level of social interaction in which your child will learn age-appropriate social skills.
