

CHATHAM COUNTY PURCHASING DEPARTMENT

ADDENDUM NO. 1 TO **BID 21-0108-3**

**FOR: PURCHASE OF AIRBORNE HIGH DEFINITION COLOR CAMERA AND
THERMAL IMAGER SENSOR**

**PLEASE SEE THE FOLLOWING ADDITIONS, CLARIFICATIONS AND/OR
CHANGES:**

RFIs about the BID:

1. Will integration and installation support be required or will the Aviation Division handle all integration requirements?
Chatham County Aviation Division has integrated several units in the past, our own system with several upgrades and several trial units. We have very talented A&P Mechanics w/3 Inspection Authorizations..
2. Will any training support be required to assist the sensor operator / crew?
Chatham County Aviation Division should not need any additional training for a standardized Airborne Law Enforcement Camera/Thermal Imager if it is compatible with standard Airborne Law Enforcement Mission Management Systems. If the proposed system is not compatible, training would need to be supplied to allow the best operation and results of the Camera/Thermal Imager.
3. Will a camera system that has a Supplemental Type Certificate (STC) be required?
An STC would be preferred but not required as the Helicopters are Operated as "Public Aircraft".
4. If yes, can you provide the make/model of the helicopter to be installed on?
The Helicopters that Chatham County Aviation Division are the MD500E and MD520N.
